

FRESHBOXX

Key Operational Advantages

No power requirement: FreshBoxx containers are lined with high performance, low temperature insulation and food grade fiberglass reinforced plastic. This design minimizes temperature loss of transported cargo to just a few degrees over a 72 hour period, without any mechanical refrigeration.

- Minimal conductive or convective heat gain inside a FreshBoxx.
- The sealed FreshBoxx protects the quality of meats, fruits and vegetables.
- Eliminates the costs involved with maintaining generators and reefer containers.
- Eliminates the costs incurred by fuel pilferage.

Highest security against theft: CakeBoxx, the innovative “No Doors” intermodal cargo container technology that raises the bar for cargo security. Once a FreshBoxx container is sealed, nothing gets in or out.

Logistics efficiency: Improving your logistics flow minimizes turnaround time and overhead involved with your products. Lowering costs and delivering a strong competitive advantage.

- Like a flatbed trailer, you can load and unload from all sides. Faster and with more ease.
- Maximize the loading capacity, no lost space due to poorly fitted items.
- Pick and pack operations can benefit from loading directly to open decks.
- At the cold storage facility, the entire FreshBoxx can be lifted off the trailer and placed inside the controlled atmosphere environment. For fragile products in a quality conscious cold chain, this means less bruising and a longer shelf life.

Easy to open and inspect: Once the lid is lifted, contents are completely exposed for inspection by customs and authorized personnel. Nothing is more than four feet away from an inspector who can verify manifests, scan, sniff, and visually assess the entire cargo without needing to move it.

Nationwide support network: Through our partnership with DELBROS Leasing, you can benefit from nationwide support in financing, rescue, maintenance, and positioning.

Key Cost Advantages

Generator	Reefer Container	
Php 400.00 Unit Rental Php 40.00 Daily Maintenance Php 3,200.00 Daily Fuel Cost	Php 1,500.00 Unit Rental Php 40.00 Daily Maintenance	Run your numbers to see how the FreshBoxx can benefit your business!
Php 3,640.00 Per Day	Php 1,540.00 Per Day	

*Fuel Costs were computed @ 4 liters per hour @ 16 hours a day @ Php 50.00 per liter
